

# CALL FOR PAPERS

The Organizing Committee of FICR-TEAS 2020 invites researchers across the globe to present their original work with **Publication Opportunity in Scopus Indexed Springer AISC**

**"FICR-TEAS 2020" at IISU, Jaipur 17-19<sup>th</sup> Jan, 2020**  
([www.ficr.iisuniv.ac.in](http://www.ficr.iisuniv.ac.in))

**FICR International Conference on Rising Threats in Expert Applications and Solutions**  
at IIS (deemed to be University), Jaipur ([www.iisuniv.ac.in](http://www.iisuniv.ac.in))

A Historical International Get-Together of Academicians/Researchers and Industrialists from More Than 10 Countries i.e. **UK, USA, Canada, France, Germany, Netherlands, Italy, Japan, China, Korea, Thailand, Vietnam, Taiwan, etc.**

Technically Supported By **Springer, CSI, ACM, IIM Jaipur**

## Distinguished Guests

**Prof. (Dr.) E. Balagurusamy**  
Renowned Author, Former Member-UPSC  
Former VC- Anna University  
Chennai

**Prof. (Dr.) Venugopal K R**  
Renowned Author, IEEE Fellow  
ACM Distinguished Educator  
Vice Chancellor, Bangalore University, Bangalore

**Prof. (Dr.) R.S. Salaria**  
Educator, Author & Motivator  
Alumnus of IIT, Delhi

Publication(s) in the **Journals Indexed DBLP, SCOPUS, Google Scholar and Springerlink, UGC**, including  
**Springer – Advances in Intelligent Systems & Computing (AISC)**

**FICR-TEAS 2020** is the first "FICR International Conference on Rising Threats in Expert Applications and Solutions" on 17-19 January 2020, to be organized by the Department of Computer Science & Information Technology at IIS (deemed to be University), Jaipur. Technology has evolved with great speed in the last decade, resulting in the development of Expert Applications making life more effortless. The applications of Big Data, IoT, over the platforms of Cloud computing have been emerging in the form of latest apps, gadgets, robots, and others with unbelievable outcomes. However, at the same time the rising threats in Expert Applications need to be focused and analyzed while developing satisfactory solutions for the same. This will help the society to prevent itself from ill effects of the technological developments.

To understand another dimension of the conference abbreviation, it would be better to understand the word "FICR", Indian word (pronounced as "Ficr"), which means "Seeking Solutions For Worries" i.e. giving detailed thoughts to a particular issue by analysing all its pros and cons in advance, so that the issues can be addressed with proper planning and utmost care to benefit the concerned. Also, TEAS represents the most popular hot beverage "Tea" all over the world, which brings freshness. Here, through the conference "FICR-TEAS 2020", the 'worries' (Ficr) of the rising threats in the expert applications, would be discussed, analysed, and probably solved, during various Tea Sessions (and Tea Breaks) of the conference.

## Aims and Objectives

This conference aims to explore the recent technological developments, specifically the "Expert Applications" using various engineering tools, investigation and analysis of the Rising Threats associated with them and proposed solutions to these threats. This would foster reliable technological implementations for social benefits and subduing or obliterating the precarious threats associated with it.

The conference will provide an international platform to the researchers, academicians, industry representatives, government officials, students and other stakeholders in the field to explore the opportunities, to disseminate and acquire beneficial knowledge from the various issues deliberated in the paper presented on different themes in the conference. The selected papers will be published in different proceedings and journals indexed by SCI, Scopus, Web of Science, Google Scholar and others that would give an international exposure to the research carried out and opportunities to get the work viewed and cited by researchers throughout the world.

It would also be beneficial in terms of Networking, since the stakeholders from 10+ countries are expected to arrive and exchange their thoughts, ideas, solutions on research carried out in the relevant areas. This would facilitate them to create new contacts to further uplift and fulfill any future research or collaborative requirements through better networking.

## Conference Tracks

*Track 1: Expert Applications and Artificial Intelligence/Machine Learning*

*Track 2: Advance Web Technologies such as IoT, Big Data, Cloud Computing in Expert Applications*

*Track 3: Information and Cyber Security Threats and Solutions*

*Track 4: Multimedia Applications in Forensics, Security & Intelligence*

*Track 5: Advancements in App Development*

*Track 6: Management Practices for Expert Applications*

*Track 7: Social and Ethical Aspects in Expert Applications through Applied Sciences*
